---

Major electric power companies and heavy electric machinery makers in Japan are introducing and developing AI and IoT technologies for their domestic power-generating facilities due to their cost ...

As a comprehensive information and communication service provider, OPTAGE aims to promote the utilization of generative AI through the provision of container-type data centers and GPU ...

OPTAGE will open the first container-type data center for generation AI in the Kansai Electric Power Group in Mihama-cho, Fukui Prefecture, during fiscal 2026, and provide customers ...

AI-driven predictive analytics are poised to revolutionize the operational landscape of Japan's solar container power generation systems by enabling real-time monitoring, fault detection,...

OPTAGE Inc. announced that they will establish the Kansai Electric Power Group's first container-type data center for generative AI in Mihama-cho, Fukui Prefecture, by the end of FY2026.

This insight examines the multifaceted energy strategy of Japan amidst evolving global dynamics and ambitious climate targets. Section 2 explores the landscape of key current energy policies and ...

Japan has deployed the Yoroi Reactor, a sealed, shipping container-sized microreactor, in remote communities. Designed for disaster resilience and clean energy access, the Yoroi runs for ten ...

Japan, with its advanced technology in these areas, cannot afford to miss this golden chance to transform its power-constraints challenge into something game changing. Quantitative ...
