According to the introduction, this project is currently the largest internally built pumped storage power station in Henan Province, with a total installed capacity of 2.1 million kW and a total ...

On November 27, 2022, the construction of Jiufengshan Pumped Storage Power Station in Huixian County, Henan Province began. The total investment of the project is planned to be 13.161 billion ...

Welcome to the Jiufengshan Energy Storage project, where lithium-ion batteries meet innovation on an industrial scale. As global energy demands skyrocket, this facility isn't just keeping lights on - it's ...

On August 2, 2024, State Grid Corporation of China held the 2024 Supplier High-Quality Development Event, focusing on quality leadership and innovation-driven development to jointly build a new ...

On December 4, 2025, Jiufengshan (JFS) Laboratory announced a major technological breakthrough -- the successful development of a gallium nitride (GaN) power module.

Researchers at Jiufengshan Lab in Hubei province have unveiled a new gallium nitride power module that promises to dramatically cut the energy consumption and cost of massive AI computing centers. ...

On December 12, 2022, Henan Public Resources Trading Center announced the successful candidates for the civil engineering and metal structure installation of the upper reservoir, lower reservoir, water ...

(Yicai) Dec. 4 -- The Jiufengshan Laboratory has rolled out a gallium nitride power module which can significantly cut power consumption and electricity costs in artificial intelligence data centers, the ...
