Current Structure of the Power System Taking into account newly commissioned facilities, Kazakhstan's power system currently includes 241 energy sources, of which 162 belong to renewable energy sources.

Power from wind, solar, biomass and water up to 35 MW, plus geothermal sources, are eligible for the tariff and transmission companies are required to purchase the energy of renewable energy producers.

However, up until recently, solar resources of the country were not being used for power generation. Kazakhstan is developing solar energy technologies, namely production of photovoltaic modules ...

As part of the implementation of the instructions of the President of the Republic of Kazakhstan, Kassym-Jomart Tokayev, delivered on 28 January 2025 at an expanded meeting of the ...

Listed below are the five largest upcoming Solar PV power plants by capacity in Kazakhstan, according to GlobalData's power plants database. GlobalData uses proprietary data ...

According to the Ministry of Energy, Kazakhstan currently operates 154 renewable energy facilities with a total installed capacity exceeding three gigawatts (GW), including wind, solar, ...

The total installed capacity of solar power plants in Kazakhstan reached 1.312 GW. The overall electricity generation from renewable energy sources (RES) in 2025 amounted to 8.621 billion ...

Solar energy can be widely used in two-thirds of Kazakhstan's territory. The government aimed to put 28 solar power plants into operation by the end of 2021, and met this goal, with currently ...
