We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

The Kiribati Energy Storage Project is flipping the script, combining solar arrays with massive battery banks to create a hybrid power system. Think of it as giving the islands a giant ...

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage ...

Energy storage battery containers offer a scalable, renewable-driven solution to stabilize grids and reduce carbon footprints. This article explores how these systems work, their benefits for Kiribati, and ...

Containerized energy storage solutions now account for approximately 45% of all new commercial and industrial storage deployments worldwide. North America leads with 42% market share, driven by ...

The Government of Uganda has authorised engineering, procurement, and construction (EPC) contractor Energy America to build a 100MWp solar PV plant, integrated with a 250MWh battery ...

Specializing in island microgrid solutions, we deliver turnkey energy storage systems for coastal and remote regions. Our patented corrosion-resistant battery enclosures have been deployed across 12 ...

Completed in Q1 2025, this 3.5MW/14MWh facility combines lithium-ion batteries with AI-driven energy management. Wait, no - actually, it's using a hybrid system.
