DTEK partnered with American energy firm Fluence Energy Inc. -- which provided 698 Gridstack batteries to the project -- to build and connect six new battery storage systems to the grid ...

The project aims to enhance energy supply security and mitigate risks of outages, while also facilitating the integration of renewable energy sources into Ukraine's national grid.

The initiative to build the 200 MW advanced energy storage system was announced in January 2025. The project included six units and was initially estimated at EUR140 million.

The project was developed in partnership with American energy company Fluence Energy Inc. The 200-megawatt system spans six locations across Ukraine and represents one of Eastern ...

Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

Fluence and DTEK (through its subsidiary DTEK Renewables) plan to complete the project by October 2025, so that systems are in place before the 2025/26 winter season to ...

Total investment in the project by DTEK amounts to EUR125 million. The energy storage systems will provide Ukraine's power grid with a higher level of resilience and stability, while also ...

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ...
