"This energy storage system will be the first in the region that will enable Kosovo to integrate renewable energy into the grid, stabilize energy supply and reduce import dependence.

To create a secure energy sector focused on citizens, with the solar auction aligning with these goals. A foundation for a new, competitive, and sustainable energy sector in Kosovo.

The Resident Country Director of the Millennium Challenge Corporation, Rinor Gjonbalaj, highlighted that the energy storage system will be the first of its kind in the region. According to him, ...

The fact that Kosovo is at an early stage of its energy transition means that it is still possible to ensure that the main policies and interventions can be just and equitable to all groups.

USAID Energy Sustainability Activity aims to improve Kosovo's energy security by strengthening the capacity and sustainability of local institutions to advance energy market development and regional ...

Kosovo has taken a significant step towards a sustainable energy future by granting its first-ever licenses for battery energy storage systems.

The government of Kosovo this week announced it will build a battery energy storage system (BESS) with a capacity of 200MWh-plus to deal with the country's energy crisis.

The Presidency of Kosovo announced on Wednesday afternoon that it had received confirmation of the continuation of the \$202 million MCC grant, centered on the battery storage ...
