What is the energy supply in Libya?

In 2020, the total energy supply (TES) primarily came from oil and gas, which contributed 53% and 43%, respectively, while renewables accounted for approximately 4%. Bioenergy comprised 100% of the renewable energy supply. Oil is the major natural resource of Libya, with estimated reserves of 43.6 billion barrels. Libya is a member of OPEC.

How has civil unrest affected Libya's energy exports?

Following the outbreak of civil unrest in mid-February, Libyan oil and natural gas production has been cut by 60 to 90 percent, affecting Libya's energy exports. Oil exports have fallen with production and Libya's natural gas exports to Italy via the Greenstream pipeline stopped in late February.

How much oil does Libya export?

Crude oil and natural gas export revenues are a significant part of Libya's economy, accounting for an estimated 97% of Libya's total government revenues and an estimated 93% of the country's total value of exports in 2023.¹³ We estimate that Libya's net oil export revenues totaled \$30 billion in 2023, similar to 2022 totals.

Does Libya still have oil production?

Oil & Gas Journal, "Worldwide look at reserves and production", December 2023. The Libya Observer, "OPEC retains Libya exemption from oil output cuts", January 4, 2022. U.S. Energy Information Administration, "Conflict in Libya since 2011 civil war has resulted in inconsistent crude oil production," August 12, 2022.

With frequent power fluctuations and growing demand for renewable energy integration, outdoor energy storage cabinets have become critical infrastructure in Benghazi.

The answer lies in energy storage batteries - or rather, the lack of reliable wholesale suppliers. As global battery prices drop 18% year-over-year (plausibly citing the 2023 Gartner Emerging ... position Libya ...
