Let's dissect LONGi's photovoltaic grading system through the lens of a solar installer who once confused B-grade panels with abstract art. The differences between A and B class panels extend ...

The release of the 'Longi Life Cycle Standard' promotes the high-quality development of the photovoltaic industry. At the same time, the use of Longi standard orders has improved delivery ...

LONGi provides you with the most comprehensive product data information so that you can quickly understand LONGi's full range of products.

The EnergySage classification system incorporates technical specifications for solar panels, inverters and batteries to compare their performance, durability, warranty and overall quality.

The application level of LONGI Solar module is Class II, which can be used in systems operating at > 50 V DC or > 240 W. where general contact access is anticipated;

This document provides an installation manual for LONGi photovoltaic modules. It discusses safety precautions that should be followed, including that installation requires professional skills.

According to the corresponding certification standards, the fire rating of LONGi Mono-facial modules is UL type 1 or 2 or IEC Class C, the fire rating of LONGi bifacial modules is UL type 29 or IEC Class C.

LONGi Bright products are used on buildings to achieve an appealing appearance along with a moderate amount of PV generation capacity, such as industrial roofs and building facades, powering ...
