Arevon Energy's new 200 MW Peregrine battery storage in San Diego can power 200,000 homes for two hours during peak demand.

A major energy storage installation is advancing in California as the Sacramento Municipal Utility District prepares to launch a 160-megawatt, 640-megawatt-hour battery energy storage system ...

The Bihar government has signed an MoU to procure electricity from a significant solar power project in Lakhisarai, featuring a 301 MW capacity and 523 MWh battery storage. Expected to ...

The natural gas capacity additions at the Intermountain Power Project will replace 1,800 MW of coal-fired capacity at the plant, which is scheduled to be retired in July. Data source: U.S. ...

Utility-scale battery energy storage systems (BESS) are a foundational technology for modern power grids. Unlike residential or commercial-scale storage, utility-scale systems operate at ...

Gemini features a battery energy storage system that provides a consistent, dispatchable energy resource designed to ensure that power needs are met during peak demand in Clark County.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California,...

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.
