China has begun construction on the world's largest pure-hydrogen power generation project in Ordos, Inner Mongolia, featuring a 30MW hydrogen-fired turbine fully integrated into a ...

Located in Ganqimaodu township, the project, owned by Inner Mongolia Energy Group Co, comprises 150 turbines of 10 megawatts each, forming the country's biggest "giant matrix" of ...

The wind farm comprises 98 wind turbines and three offshore booster stations, with a total installed capacity of 800 megawatts, according to the CTGC.

With the launch of the newly connected wind farm, the prefecture is building a clean energy system that includes about 58 percent of solar power, 35 percent of hydropower, and seven ...

BEIJING, Dec. 28 (Xinhua) -- A mega solar and wind power base kicked off construction in China's seventh-largest desert on Wednesday. With an overall installed capacity of 16 million kW, the project ...

The first-phase wind turbines of the 300-megawatt wind power project in northwest China's Xinjiang Uygur Autonomous Region have been connected to the grid, China Huaneng Group said on ...

The wind power project is expected to transmit about 18.9 billion kilowatt hours of green electricity to the Beijing-Tianjin-Hebei region each year once it is up and running.

On December 28, 2022, China Three Gorges Group started constructing the world's "largest" wind and solar PV power generation project with upgraded coal representing 16 GW ...
