Looking at historical data, project pipelines and numerous (often highly optimistic) announcements of future plans and targets, large differences among countries are observed, indicating that the energy ...

In a region of the world renowned for its vast and substantial oil and gas reserves, several nations in the Middle East are shifting their energy sectors towards hybrid wind-solar-storage mega ...

Worldwide expansion of intermittent renewable energy sources, such as solar and wind power, has placed electricity storage systems on the verge of global expansion as energy storage systems ...

Middle East Energy 2026 is further amplified by three co-located powerhouses: The Battery Show Middle East, Intersolar Middle East, and Energy Storage Middle East . This integrated yet ...

This landmark event will explore the Middle East's trajectory to become the third largest storage market globally by 2026, with a special focus on the region's ambitious renewable energy ...

A new analysis by DNV finds that the Middle East is entering a period of rapid renewable power growth, led by very large solar projects and the increasing use of energy storage.

The region's most significant wind power projects - those recently constructed, newly underway, and in the pipeline - show how it is reshaping its broader energy mix.

A collaboration of NEOM, ACWA Power and Air Products, it combines onshore solar, wind and energy storage, targeting 600 tons of daily green hydrogen output by 2026.
