Mozambique's Energy Regulatory Authority (ARENE) is running a tender for the development of minigrids comprising of solar and battery energy storage systems (BESS).

As we approach Q2 2025, Mozambique's draft National Storage Strategy aims to triple grid-connected storage capacity while establishing local battery assembly plants.

The proposed project consists of the design, construction and operation of a portfolio of 44 energy storage systems with a combined capacity of 132 megawatts of alternating current (MWAC) in San ...

Discover how Mozambique is leveraging cutting-edge energy storage solutions to stabilize its grid and attract foreign investment. Explore market opportunities, technical innovations, and the role of ...

What are energy storage cabinets? Energy storage cabinets are crucial in modern energy systems, offering versatile solutions for energy management, backup power, and renewable energy ...

Construction has begun on the 19MWp/15MWac Cuamba solar PV plant with 2MW/7MWh battery storage in Mozambique, project sponsors United Kingdom-based Globeleq, private equity firm ...

This article explores how cutting-edge storage technologies can stabilize the grid, integrate renewables, and support economic development - critical factors for businesses and governments investing in ...

The project is the first IPP in Mozambique to integrate a utility scale energy storage system and includes an upgrade to the existing Cuamba substation. Electricity will be sold through a ...
