Elon Musk targets 100 GW of annual solar manufacturing for both Tesla and SpaceX within three years to solve the energy bottleneck threatening the AI revolution.

Recently, Elon Musk proposed a plan to deploy 100GW (gigawatts) of photovoltaic capacity in space each year, instantly triggering a buzz around the space photovoltaic concept in the ...

Musk's statement, a response to a chart showing solar's dominance in new electricity growth, highlights a critical bottleneck for the AI boom: a lack of power. Tech giants are scrambling to...

Shares of Chinese solar panel makers surged after a team of staff sent by Elon Musk had reportedly visited several photovoltaic suppliers in China.

Elon Musk announced at the World Economic Forum in Davos that both SpaceX and Tesla are independently working to build 100 gigawatts of solar manufacturing

Elon Musk has outlined plans to build massive solar-powered data centres in space, arguing that Earth cannot sustain AI's rising energy demands. The proposal follows a SpaceX-xAI ...

Elon Musk's latest initiative through xAI to establish an 88-acre solar array in Memphis is more than just another technological endeavor; it marks a pivotal moment in regional economic ...

According to Musk, this rapid expansion places China at the forefront of providing the energy resources required for the next generation of power-hungry AI technologies.
