The Walo solar-storage IPP - seen as a landmark development for Senegal's grid - has been officially commissioned.

It is the first utility-scale energy storage project in Egypt, defining a new era for clean energy deployment in North Africa. Developed by AMEA Power and constructed by Energy China ...

The adoption of renewable energy storage systems is a primary driver for the rise in expanding electricity access across Africa over the past two decades. There is still much to be ...

North Africa isn't just trading spices anymore - it's becoming the world's renewable energy warehouse. Morocco's Noor Complex solar farm (3 GW capacity) recently added 800 MWh battery ...

The African Development Bank (AfDB) announced that it would commit \$379.6 million over the next seven years to provide funding for 500 MW of solar energy and storage for the Desert to Power G5 ...

North Africa's energy landscape is transforming rapidly, with small-scale energy storage systems emerging as game-changers. This article explores how compact power stations are solving grid ...

Intersolar Africa 2026 Energy Storage Intersolar Africa 2026 highlighted energy storage as the central theme, with Ganesh, TWS Africa, HyperStrong, ISTECH, and ZYC showcasing scalable, ...

Solar and wind projects across Morocco, Egypt, and Algeria now require large-scale storage systems to address intermittent power generation. Let's explore how modern engineering meets desert ...
