Will North Korea build a tile factory in Pyongyang?

North Korea's trade ministry recently approved plans by a North Korean-Chinese joint venture to build tile factories in Pyongyang and in a region near the China-North Korean border.

Where is solar installed in North Korea?

Today, solar can be found on some of North Korea's most important or high-profile civilian factories, outlined below. The factories were chosen for the size of the installation and their notability, usually though consistent mentions in state media reporting.

Are solar panels a real thing in North Korea?

Larger solar installations have also sprung up at factories and government buildings over the past decade. Jeong-hyeon, a North Korean escapee, told the Financial Times that many residents in Hamhung, the second-most populous city, "relied on a solar panel, a battery and a power generator to light their houses and power their television".

Does North Korea have solar?

However, despite its growing prominence, solar installations still only make up a fraction of office and factory rooftops in North Korea. Today, solar can be found on some of North Korea's most important or high-profile civilian factories, outlined below.

Prices of solar panels have dropped in recent years thanks to an influx of cheap Chinese imports and a rise in domestic assembly of panels within North Korea, according to the Stimson...
