How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of EUR0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of EUR0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of EUR0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of EUR0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

Are low-cost photovoltaic modules escaping the price war?

The company recorded price reductions of around 4%, with only low-cost photovoltaic modules escaping the trend. Specifically, in August 2025, the Price Index showed: about EUR0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. "Manufacturers are moving quickly to end the devastating price war.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market.

In November 2024, the price of solar panels saw another significant drop, continuing the annual trend. However, analysts at pvXchange Trading believe this trend might not persist much longer.

This trend data tells the story of the U.S. distributed generation solar module market's last quarter. Example graph from Anza's Q4 2025 Quarterly Report, showing median module prices holding firm ...

The user wants to know about price trends for photovoltaic (PV) panels. To address this, I need recent data on PV panel prices, factors influencing these trends, and insights from major ...

Solar photovoltaic panel prices Average price of solar modules, expressed in US dollars per watt, adjusted for

inflation.

Price Trend: Driven by rising silver prices, mainstream cell transaction prices have climbed to around RMB 0.42/W, with tier-1 producers quoting RMB 0.43-0.45/W. Current cell price levels are ...

Prices fell by an average of 8% across all technologies, squeezing margins even on recently purchased modules. This drop resulted from moderate demand, year-end stock clearance ...

The photovoltaic panel price trend chart reveals a fascinating story of technological advancement and market dynamics. Over the past decade, solar module costs dropped 82% globally, but recent supply ...
