Who makes shipping container farms?

Freight Farms is the world's leading manufacturer of container farming technology with dozens of container farms in use worldwide. If you've ever seen a shipping container farm before, there's a good chance it was one from Freight Farms. They sell their shipping container farming system as The Greenery, previously named The Leafy Green Machine.

What is container farming?

Container farming is a vertical farming system that uses modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients. Essentially, the container protects a controlled environment that is ideal for growing crops, providing a solution for sustainable agriculture in small spaces.

Are shipping containers good for indoor farming?

Size: Shipping containers are a good size for indoor farming applications. They are wide enough to allow a central walking path with growing areas on each side that are at arm's length front to back.

What is shipping container agriculture?

Let's begin by saying that shipping container agriculture is one example in a long list of interesting applications for cargo boxes (container homes being the most obvious). And while the most common type of container agriculture is crop farming, there are several options for non-plant agriculture like fish or even protein-rich insects!
