Papua New Guinea has taken a huge step in its digital development journey with the release of the country's first-ever Fifth Generation (5G) mobile spectrum.

Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations.

Papua New Guinea's Acting Minister for Information and Communications Technology, Hon. Peter Tsiamalili Jnr, has announced the allocation of the 5G mobile spectrum, marking a ...

DataCo's nationwide digital infrastructure carries 5G signals and services. Without a strong fibre network and secure data centers, 5G could not reach PNG's people effectively.

Through this partnership, they will launch the PCW-400i, their advanced 5G small cell base station, designed to enable new Industry 4.0 use cases in a very cost-effective way.

Papua New Guinea Acting Minister for Information and Communications Technology, Hon. Peter Tsiamalili Jnr, has announced the release of the Fifth Generation (5G) ...

Acting Information and Communications Technology Minister, Hon. Peter Tsiamalili Jnr, made the announcement yesterday, describing the development as a significant advancement in the ...

"Access to fast and reliable Internet and mobile services is essential therefore the release of the 5G spectrum will support better connectivity and access to the latest wireless technologies.
