We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

A small factory located in Papua New Guinea recently installed a complete 50KW solar energy storage system. This system effectively meets the daily operational electricity demands of the ...

The Asian Development Bank (ADB) has opened an international tender to design, supply, install, and commission a 1 MW solar-plus-storage minigrid in Papua New Guinea's Central ...

This mini-grid system features a 103 kWp solar array supported by 122 kWh of battery storage utilizing advanced lithium iron phosphate batteries. This project is funded by USAID and ...

The project encompasses the construction of a hybrid pv system and battery energy storage system (BESS) minigrid to be built on the island of Buka, within the autonomous region of ...

We are an experienced Papua New Guinean owned business focused on offering products from diverse manufacturers to best suite your needs. We have a team that is able to help with design, and we ...

Energy Storage and Hybrid Solutions: We integrate advanced battery storage with solar to provide continuous power, even during nighttime or cloudy conditions. For areas with partial access to ...

The project encompasses the construction of a solar and battery energy storage system (BESS) minigrid to be built on the island of Buka, within the autonomous region of Bougainville in ...
