---

Our mid-node 500 kW/250 kWh Battery Energy Storage Systems (BESS) are designed to satisfy a variety of on and off-grid applications, enabling reduced emissions and costs.

This solution uses 5 sets of modular outdoor cabinet energy storage system, which supports up to 15 units in parallel. It's an ideal choice for peak-shaving and valley-filling in zero-carbon parks and villa ...

The P500E has a modular design with a built-in STS and transformer. With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and ...

Highly efficient, scalable 200 to 500 kVA/kW 3-phase UPS featuring modular, redundant design and low TCO for medium and large data centers and mission critical environments.

Easily upgradable from 500kW to 1MW of energy storage, storing up to 3.8MWh of energy, enough to power an average 3,600 homes for one hour.

This is a 500KW small-scale commercial and industrial energy storage system. It can store electricity through photovoltaic, diesel generators, and other means, with off-grid design.

As Cebu transitions towards sustainable energy, lithium battery energy storage cabinet systems emerge as critical infrastructure. Whether you're a hotel chain managing peak demand charges or a ...

Flexible and Convenient: Modular PCS allows for linear expansion of battery units and bidirectional energy storage inverter units; it possesses independent charging and discharging control capabilities ...
