My primary research interests revolve around Multi-Agent Reinforcement Learning, Robust Reinforcement Learning and Ad Hoc Teamwork. About Multi-Agent Reinforcement Learning and Ad ...

The lightning transient calculation is carried out in this paper for photovoltaic (PV) bracket systems and the distribution characteristic of lightning transient responses is also ...

In the established solar panel brackets system, this article conducts numerical simulation on the brackets and optimizes the design of the main beam part of the brackets based on the analysis results.

In order to achieve the effective use of resources and the maximum conversion rate of photovoltaic energy, this project designs a fixed adjustable photovoltaic bracket structure ...

Taking a photovoltaic power plant as an example, a large-span suspension photovoltaic bracket is established in accordance with the requirements of the code and optimized. By adjusting the cable ...

The utility model aims to provide a flexible photovoltaic bracket and aims to solve the problem that in the prior art, a photovoltaic plate on a guy cable cannot be subjected to angle...

Save construction materials, reduce construction cost, provide a basis for the reasonable design of PV power plant bracket, and also provide a reference for the structural design of fixed ...

The development direction of flexible photovoltaic bracket includes material innovation, structural optimization and intelligent design, which will play an important role in promoting the ...
