Get custom cut tapes from LAMATEK(TM) for solar panel frame bonding, junction boxes, and edge protection. Separator pads and surface protection films available.

Trelleborg Sealing Profiles is an innovative forerunner for sealing profiles in solar energy applications. We can provide application expertise that will ensure a long service life of the sealing components, ...

They are ideal for edge protection on solar panel frames and aluminium rails, as well as for gap sealing between modules to prevent water ingress and dust accumulation. Many installers also use these ...

Sika develops bonding and sealing solutions in close cooperation with its customers in the photovoltaic industry.

3M(TM) Solar Edge Tape 1060 is specifically designed for solar module sealing and protection. It consists of high-quality acrylic foam adhesive with superior weathering black backing film.

SimpleGrip-SQ is designed to attach PV modules to rolled and membrane roofs with pitches from 1/4:12 - 21:12. The base is compressed between two layers of adhesive tape to create a watertight seal ...

WACKER silicone rubber grades are ideal for bonding the PV laminate, usually comprising a front glass, encapsulation films in front of and behind the solar cells, and a back-sheet, to the aluminum frame.

Plate columns can be designed to accommodate a broader range of vapour and liquid flow rates, whereas packed columns tend to be appropriate for exceptionally low liquid flow rates.
