Data source: U.S. Energy Information Administration, Form EIA-63B, Monthly Photovoltaic Module Shipments Report Note: Includes both domestic shipments and exports.

The primary destinations for solar panel exports include China, the United States, Germany, Japan, and India, which collectively dominate the global solar panel trade.

The Solar Photovoltaics Supply Chain Review, produced by the DOE Solar Energy Technologies Office with support from the National Renewable Energy Laboratory, will help the ...

Discover all statistics and data on Global solar PV supply chain now on statista !

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories.

Future import levels hinge on the outcome of a new US investigation into the alleged illegal import of crystalline solar cells and panels from Vietnam, Thailand, Malaysia and Cambodia.

The Top 4 countries from which the United States imports solar panels are the same four countries in the ongoing AD/CVD investigation: Vietnam, Thailand, Malaysia and Cambodia.

Until FY2024, three of the largest domestic PV manufacturers - Waaree Energies, Adani Solar and Vikram Solar - accounted for most of India's PV exports. Each company exported more ...
