How much does electricity cost in Portugal?

Starting January 2025, electricity price in Portugal increased by 2.1%, as reported by Idealista. This rise is linked to inflation and adjustments in energy production costs. Currently, residential electricity prices range from EUR0.20 to EUR0.25 per kilowatt-hour (kWh), depending on consumption levels and providers.

Why do electricity prices fluctuate in Portugal?

This dependency makes prices vulnerable to global energy market fluctuations. Portuguese electricity bills include various fees, such as VAT (6% for basic tariffs) and network maintenance costs. These additional charges significantly impact the final price paid by consumers. Curious about solar panels?

Does Portugal have a green energy plan?

Portugal is building one of the cleanest and smartest electricity systems in Europe. Between surging renewables and flexible tariffs, it's never been easier for households and businesses to go green -- and save money doing it. Time to rethink your energy plan?

What is Portugal's energy mix?

Hydroelectric power, benefiting from Portugal's river systems, and wind energy are among the most significant contributors to the country's energy mix. Solar power is also on the rise, taking advantage of the country's sunny climate. Portugal's commitment to renewable energy is evident in its ambitious targets and policies.

Electricity spot prices in Portugal today, hour by hour. Including prices for the last 30 days.

From ditching coal to rolling out real-time energy pricing, the country's electricity market has gone through a major transformation between 2023 and 2025. Here's a snapshot of how Portugal is ...

In this blog, we'll delve into how much electricity costs in Portugal in 2025, the factors affecting prices, and actionable steps to manage your energy expenses.

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Portugal renewable energy market, worth USD 13-14 Bn, aims for 80% renewable share by 2030, fueled by solar PV expansion, offshore wind projects, and energy storage advancements.
