How much does a greenhouse cost in Israel?

In Israel, greenhouse farming is becoming increasingly popular due to the country's Mediterranean climate. A greenhouse typically costs around \$60,000 to build, but this cost can change depending on the size and specifications of the structure. In addition, necessary permits and licenses may also cost money.

Why should you explore the greenhouse industry in Israel?

When exploring the greenhouse industry in Israel, several key considerations are essential. The country is known for its advanced agricultural technologies, particularly in greenhouse cultivation, which allows for year-round production despite its arid climate.

Is greenhouse farming profitable in Israel?

According to a study conducted by the Israel Agricultural Research Organization (IARO), greenhouse farming is more profitable than traditional farming in Israel.

Is Israel a good place to grow a greenhouse?

One limitation is that Israeli climates are not ideal for greenhouse cultivation. The average annual temperature is around 18 degrees Celsius, which is too cold for most plants. Additionally, the country experiences very high variability in weather conditions, which can damage crops if they are not well-adapted to the climate.
