---

This leads to new materials and joining techniques which have to be implemented into production and installation. The appropriate adhesive technology enables cost savings, increased production ...

Today, we are a leading manufacturer of tapes, adhesives and films for bonding, protecting, masking, appearance enhancement, cushioning, mounting and more.

Butyl Strip for Solar Photovoltaic is a high-performance sealing solution designed specifically for dual-glass photovoltaic modules, including advanced cells like HJT and perovskite.

The SOLARTAB™ film adhesive application uses proven fluorinated polymers and patented process to ensure contact resistance as low as traditional solder-tabbing. Melt-tabbing at less than 150°C ...

We have a wide variety of solar panel adhesives, from quick-curing adhesives for attaching the junction box to the PV panel to two-component aliphatic polyurethane compounds with exceptional UV ...

In conjunction with Photovoltaic solar panel producers PPI Adhesive Products Ltd have developed a range of tailor made products to suit the various manufacturing and assembly procedures associated ...

As a global technology leader, Adhesives Research (AR) provides connectivity, moisture barrier, and dielectric protection to critical electronics segments, including photovoltaic (PV) solar energy, solar ...

Avery Dennison offers pressure-sensitive adhesive tape solutions for a variety of solar panel bonding applications. These durable, UV-resistant solutions are easy to use and automate, and can facilitate ...
