Do data center racks offer seismic protection?

Most manufacturers of data center racks, computer server racks, and enclosures offer products that are marketed as offering "seismic protection"; however, there can be big differences in the standards used to achieve those labels, and major disparities in the level of protection that those products provide.

What happens to computer server racks in an earthquake?

In the event of an earthquake or seismic event, the type of computer server racks and server rack enclosures used to house data center IT equipment is critical. This rack is often the deciding factor in whether or not the equipment will remain active.
