Does Qatar Airways allow lithium batteries in carry-on luggage?

Qatar Airways permits lithium batteries in carry-on luggage only, adhering to international aviation safety standards. Passengers can bring devices like laptops (up to 100 Wh) and limited spare batteries (under 160 Wh). All batteries must be individually protected to prevent short circuits.

What type of batteries does Qatar Airways use?

Qatar Airways categorizes lithium batteries into three types: lithium-metal (non-rechargeable), lithium-ion (rechargeable), and installed batteries. Devices like smartwatches (lithium-metal) and power banks (lithium-ion) must follow watt-hour (Wh) limits: 100 Wh for consumer electronics and 160 Wh for approved medical equipment.

How many batteries can I bring to Qatar Airways?

You can bring a maximum of two spare lithium-ion batteries for PEDs/PMEDs and two spare lithium-metal batteries for PMEDs. Qatar Airways has specific rules for smart baggage and rideable suitcases, which often contain lithium batteries, Bluetooth, GPS, and other electronics. The rules depend on the battery type:

Can I carry a spare battery on Qatar Airways?

Check the Qatar Airways Cargo website for details. You may carry spare batteries for portable electronic devices (PEDs) and portable medical electronic devices (PMEDs). Each lithium metal battery must contain no more than 2 grams of lithium. Lithium-ion batteries cannot exceed 100 watt-hours (Wh).

You may carry portable electronic devices (PED) containing lithium ion batteries, including portable medical electronic devices (PMED) containing lithium metal or lithium ion batteries, in your hand and ...
