Could a five-in-one foldable container design boost efficiency?

A five-in-one foldable container design certified by the International Geneva-based International Standard Organization (ISO) could boost efficiency and transform the carriages of empties, claims Florida-based Compact Container Systems (CCS). The SeaFold container opened out and stacked Credit: Compact Container Systems

How long does it take a HCI container to fold?

Focusing on the most popular container in the market today (40-foot), HCI has continually evolved the main structure and design to create greater and greater efficiencies -- the container can now be folded in as little as 10 minutes with standard depot equipment like a spreader or two forklifts.

How popular is a foldable container?

As previously noted, the foldable container is now used at more than 60 depots and ports and on 15 shipping lines and growing in popularity all the time. "The shipping industry is typically very conservative," said Broekhuis.

What is a 4fold foldable container?

So it is that the 4FOLD foldable container from Holland Container Innovations (HCI) is providing a novel solution that not only reduces CO2 but offers a number of additional benefits -- more efficient to ship empties back (by a ratio of four to one!), space saving, and faster handling at the terminal.

"The opportunity to place five of our folded containers in the same slot as one 40" HC standard container is a game changer in managing container movements, maximizing storage ...

A five-in-one foldable container design could boost efficiency and transform the carriages of empties, claims Florida-based Compact Container Systems (CCS).

This study considers the empty container repositioning problem of shipping companies that use standard and 3-in-1 foldable containers with more advanced designs.

"The opportunity to place five of our folded containers in the same slot as one 40" HC standard container is a game changer in managing container movements, maximizing storage capacity, and greatly ...

Folded containers minimize storage space and shipping costs. A leading logistics provider reported that
