Can a multi-energy complementary power generation system integrate wind and solar energy? Simulation results validated using real-world data from the southwest region of China. Future ...

Regulations.gov is the federal government's platform for public access to and participation in regulatory processes.

Regulations.gov is provided as a public service to increase participation in the government's regulatory activities by offering a central point for submitting comments on regulations.

The public may still comment on the Non-Participating agency's Federal Register Documents, but the public cannot comment on the documents through Regulations.gov, nor can the public view the ...
