Summary: This guide explores the booming EU solar market, compliance requirements for photovoltaic module exports, and actionable strategies to establish sustainable partnerships.

First, given that European producers are currently highly uncompetitive compared to their Chinese counterparts, any policy that limits the ability of foreign competition will increase solar panel ...

Factories in China, mostly shut out of the U.S. market for over a decade by high import duties, have been boosting solar panel sales to Asia and Africa, data from energy think-tank Ember...

Most European Union countries are set to commit more support to help Europe's ailing solar panel manufacturers on Monday, but steer clear of restrictions on cheap panel imports from...

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

The EU has decided to ban importing goods made using forced labour, in a move that also limits access to Chinese-made solar panels. The European Parliament and European Council ...

Solar panels imported or manufactured in the European Union are subject to various regulations, directives and standards. Ensuring compliance requires that the solar panels meet ...

Or consider a scenario in which China deliberately restricts the solar panel exports to Europe as a result of flaring geopolitical tensions. Comparisons with the cut-off of Russian gas to ...
