What is a server rack & network rack?

Open and enclosed server rack and network rack solutions for a variety of environments including data centers, server rooms, network closets, offices, industrial, and specialty applications. Bring networking and computing exactly where you want it - like the factory floor or warehouse - with NEMA & IP ratings to protect from dust and moisture.

Where are server racks made?

Since 1999, we have provided server racks, cabinets, and enclosures that continuously satisfy our customer's high standards and are Made in the USA! Our IT products are flexible and compatible with all rack mount servers or other electronics, to adapt to changing needs.

What is a NEMA 12 rackmount enclosure?

Built to NEMA 12 specs (IP54 equivalent) when dust and water drips or splash resistant racks are required. These Rackmount enclosures are offered up to 47u with up to 41.75" usable rack depth. Useful in factory environments, construction areas, power stations, shipping facilities, warehouses or processing plants.

What is an enclosed server rack?

Server Racks that are protected from all four corners are called "enclosed frames." These are available with locks one or two locks on the front, back or both. Because of the extra metal, enclosed frame racks are a bit more expensive and allow less airflow. The walls allow for more cable management, fans and sensor accessories to be mounted.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build ...
