What is sc5000ud-mv-US?

Guess you want to find it. Guess you want to find it. SC5000UD-MV-US is a utility-scale power conversion system (PCS) designed to support full power operation up to 1500V with a high-performance inverter that delivers 5000 kVA.

How does the SC5000 work?

Good question: It means that once the job set up has been made, the SC5000 will run automatically - feeding and cutting - without an operator in attendance. Simple. Owing to the sophistication of the software supplied with the cutting device, the cutter can easily handle a stack of mixed jobs.

How much space does a SC5000 take up?

The SC5000 is a seriously professional and productive machine, that is loaded with professional production features but takes up only around 1 square metre of floor space. It even weighs-in at around the same low price-point as its nearest rival!
