Though it is extremely difficult and expensive to replace the present AC distribution system by DC, bypassing the existing AC grid and forming smaller DC microgrids is a viable alternative....

Figure 3 shows the schematic of a DC microgrid. As compared to an AC microgrid, it can provide significant energy shavings by reducing the number of converters inside the microgrid...

In a first case, the cross sectional area of the cable were the same for each line segment and hence the microgrid was homogeneous. The cable is AWG2 of 6.544mm with a maximum current of 96A.
