How is hexa renewables funded?

I Squared's HEXA Renewables is funded by its flagship Global Infrastructure Fund III and its Growth Markets Fund. The firm will also draw on capital for the projects from a separate pocket of financing provided by the US International Finance Development Corporation, with which I Squared signed an agreement in June.

Are Chinese solar producers fighting each other?

Chinese solar producers, they argue, are fighting each other in an exceptionally fierce battle for market share, which is forcing them to make constant heavy investments in new production lines making the latest generation of technology. This tussle is set to calm down, Wood Mackenzie's team reckons.

Did solar companies overestimate the pace of solar installation growth?

But the world's solar factories -- overwhelmingly in China -- now have enough capacity to produce 1,200 gigawatts' worth, most of which is sitting unused, according to BloombergNEF estimates. Did these companies simply overestimate the pace of solar installation growth? Not necessarily, according to analysts at Wood Mackenzie.

Shen said this was the first time I Squared has invested in the Malaysian power sector, because the renewable power investment regime had not been very friendly to foreign investors in ...

"Wind and solar power, along with EVs, were all emerging industries that required substantial investment and technological research 20 years ago...The risk of failure was high, but the ...

Explore Shenzhen Energy Group's in-depth company profile, including funding details, key investors, competitors, and acquisitions.

The transaction involves two PV solar power plants in China totalling approximately 69.5 MWp.

We are excited to announce that HEXA Renewables, backed by global infrastructure fund I Squared Capital, has teamed up with the Taiwanese government and completed the commissioning of the ...

Shen said this was the first time I Squared has invested in the ...

Are you thinking about switching to a renewable energy source? Solar power is a smart investment. Solar energy continues to get cheaper, and the trend will continue into 2021.

In 2024, China allocated 6.8 trillion yuan (\$940 billion) into clean energy, bringing its investment close to the global fossil fuel funding total of \$1.12 trillion, according to a new analysis by UK-based research ...
