How much will Slovenia spend on solar energy projects?

Data Protection Policy Slovenia has set aside EUR16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

What is the Slovenian energy policy?

The purpose of the measure is to accelerate the deployment of investments in renewable energy production and energy storage, with the aim to foster the transition to a net-zero economy. The Commission found that the Slovenian scheme is in line with the conditions set out in the Temporary Crisis and Transition Framework.

Will Slovenia subsidize new self-sufficient PV energy communities?

The Slovenian Ministry of Cohesion and Regional Development has launched a EUR16 million program to subsidize new self-sufficient PV energy communities. The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement.

How much power does a photovoltaic system need in Slovenia?

The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement. "The total nominal power of the installed photovoltaic modules must be at least 100 kW, with or without battery energy storage systems," the authorities said.

The European Commission (EC) on Friday approved, under EU state aid rules, a EUR-150-million (USD 161m) scheme in Slovenia that aims to support the expansion of renewable energy, ...

The subsidy can cover up to 45% of eligible investment costs, or a maximum of EUR 225 per kWh of battery storage capacity.

Slovenia has set aside EUR16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program...

The grants are intended for the purchase and installation of battery storage units, hybrid inverters, and electrical installations and equipment. The subsidy can cover up to 45% of eligible ...

The European Commission has approved a EUR150 million Slovenian scheme to support the rollout of renewable energy and heat as well as energy storage, in line with the Green Deal Industrial ...

The European Commission has given the go-ahead to a EUR150 million (US\$160 million) state aid scheme for renewable energy and energy storage in Slovenia.

Heat pumps, solar thermal collectors, wind farms, wood biomass boilers, and storage tanks connected to new industrial facilities will all receive subsidies through the funding program.

Up to 45 per cent of eligible costs can be covered for solar panel systems, and up to 30 per cent for battery storage systems, capped at 350 euros per kilowatt and 225 euros per kilowatt ...
