Where will Sofia's offshore construction base be located?

Port of Blyth will be the location of the offshore construction base for Sofia's team for the duration of offshore works. Specialist Marine Consultants will deliver offshore resources and services for the project's offshore construction phase. 1400MW wind farm on Dogger Bank, North Sea. Now under construction.

Who will build Sofia's 100 wind turbines?

Siemens Gamesa Renewable Energy (SGRE) will manufacture, fabricate and install Sofia's 100 wind turbines. GE's Grid Solutions will be responsible for the engineering, procurement, construction and installation of the offshore (and onshore) HVDC converter stations capable of transmitting 1,400 megawatts of power at 320 kilovolts.

Who will transport and install Sofia's offshore converter platform?

Heerema Marine Contractors will transport and install Sofia's offshore converter platform using Sleipnir, the world's largest sustainable semi-submersible crane vessel. Cadeler has commissioned two brand new X-class vessels to transport and install the project's 100 turbines. They will be completed in late 2024 and early 2025 respectively.

Who will deliver Sofia's 100 extended monopile foundations?

EEW will deliver Sofia's 100 extended monopile foundations under a contract with Van Oord. Port of Blyth will be the location of the offshore construction base for Sofia's team for the duration of offshore works. Specialist Marine Consultants will deliver offshore resources and services for the project's offshore construction phase.

Offshore construction started in 2023, with fabrication of the offshore components well underway at that stage. 2024 was a busy year which saw the installation of the first turbine, the installation of export ...

There are indoor and outdoor cabinet types to meet the needs of various installation sites. Modular rack-mounted design, flexible configuration, easy expansion, and maintenance. The power module adopts ...

It is thought to be the largest offshore wind converter platform of its type in the world. The installation was carried out by Heerema, using its Sleipnir heavy lift vessel, as a subcontractor to the ...

DC DC power supply module for energy storage systems, modular design, 99% efficiency, customizable, easy expansion, fault-tolerant, reliable operation.
