By the end of this Solar Power Design, Installation, and Maintenance Training, participants will be capable of approaching solar projects from a systems-thinking perspective.

Master preventive, corrective & advanced O& M practices for solar PV plants with hands-on tools, testing & monitoring. No prior experience is needed. You will learn everything about Operation and ...

With funding from the U.S. Department of Energy Solar Energy Technologies Office, Amicus O& M Cooperative has created this new training specifically for Solar PV and BESS Operations and ...

This high-quality, 3D-animated computer-based training program encompasses a wide range of essential topics and OEM-specific content for solar site operations and maintenance.

This course trains PV technicians to safely and effectively perform O& M tasks, including inspections, commissioning, performance verification, and troubleshooting.

Read the Certification Handbook to figure out how many training hours you need to qualify for a NABCEP Exam. Click on Provider link for class schedule, price & other details.

Students in the Solar Energy Technician program will develop a wide range of knowledge and skills that cover everything from solar PV system design and installation to maintenance and commissioning.

This course covers aspects of start-up procedures, testing, troubleshooting, and maintenance requirements for residential, commercial and battery-based PV systems.
