We Are Mainly Engaged In R& D, Production And Sales Of PV Modules And Lithium Batteries, As Well As Providing Customers With Solutions For Solar Energy Projects.

Understand how to select the best solar mounting structure--strut, lip, C-channel, SHS, or RHS--based on your roof type, clearance needs, load conditions, and durability expectations.

Steel lip channels, commonly known as C-sections or C-channels, are widely utilized in solar panel mounting systems as strong and versatile structural components.

Z Purlin (90 Lip): Strong and rigid profiles used for main support beams and creating a stable foundation for the solar array. Z Purlin (45 Lip): Similar to the 90-degree lip version, but with a different angle, ...

This Stainless Steel clip and wire mesh system prevents pest birds and animals from getting behind the solar panels and damaging the electrical or mechanical systems.

"For 16 years, YHeng Group has manufactured solar C-channels that meet global standards through ISO-certified facilities. Our galvanized profiles feature proprietary DuoSeal(TM) technology achieving ...

C Lipped Channel Photovoltaic Bracket is a structural component used for solar photovoltaic system installation. It is usually made of galvanized steel or stainless steel, with high strength to withstand ...

C Lipped Channel Photovoltaic Bracket is a structural component used for ...
