Solar technologies are categorized as either passive or active depending on the way they capture, convert and distribute sunlight and enable solar energy to be harnessed at different levels around the ...

Rapid Solar Installation Growth: There has been rapid growth in solar installations, particularly in rooftop and domestic systems, demonstrating increasing interest and uptake of solar energy in Sweden.

Need Help? If you are having problems logging into SOLAR, there are a number of self-help and support resources available to you:

Renewable energy includes wind, solar, biomass and geothermal energy sources. Within the context of the European Union's 2009 Renewables Directive, Sweden was working towards reaching a 49% ...
