The Solar Energy Industries Association's (SEIA) PV Recycling Working Group has been preparing for solar recycling needed in coming years by developing the SEIA PV Recycling Partner Network.

Learn the full scope of solar decommissioning. Key topics include panel recycling, dismantling best practices, and calculating cost estimates for PV facilities.

This Article gets into everything needed to create a working solar plant decommissioning strategy.

Solar farm decommissioning is the systematic process of dismantling and removing solar energy systems once they reach the end of their operational life. This typically occurs after 20-25 ...

Homeowner's insurance may cover personal property loss, including solar components. It's imperative to report the demolition to the insurance company promptly. Depending on the ...

In recent years, state legislatures have begun to impose specific decommissioning requirements for existing and new renewable energy facilities, such as determining costs, financial ...

At the end of a solar farm's life or a Power Purchase Agreement (PPA), owners have a few options for moving forward. They can repower the plant, in full or partially, or they can ...

With the continued growth of the U.S. solar market, it's no surprise that legislators are seeking to ensure that these facilities are properly decommissioned at the end of their usefulness.
