This week, China broke ground on a massive new 55 billion yuan (\$7.7 billion) project in Shanxi province southwest of Beijing that will combining wind turbines, solar panels, and battery ...

This study aims to estimate China's solar PV power generation potential by following three main steps: suitable sites selection, theoretical PV power generation and total cost of the system. ...

Under our solar net metering contract, we get paid for our net generation. Unfortunately, our current contract expires in a couple of years and then we will no longer be paid for our excess generated power.

Through a detailed analysis, this paper reveals the complex relationships of unification, opposition, interdependence, mutual consumption, and transformation inherent in these philosophies.

Adopting a symbiotic perspective, this study aimed to examine the paradoxical interrelationship of the energy-economy-environment nexus through the novel lens of Yin-Yang ...

Solar, wind, nuclear, and hydro capacity is now at a level where it can meet and eventually outpace growth in energy demand in China, according to Lauri Myllyvirta, lead analyst for CREA.

This would represent more clean energy generation capacity than any other country, which is critical to achieving peak emissions ahead of its 2030 target.

It is the first time that the judicial authorities clearly deem the & quot;yin and yang& quot; contracts as a behavior of tax evasion, aiming to help prosecutors and judges solve tax-related ...
