Go off-grid in British Columbia with solar power & battery storage. We design custom off-grid solar systems for homes, cabins & remote locations. Get a quote!

The Solar Supermarket provides the largest selection of solar panels, inverters, batteries, charge controllers and balance of system components to Canadians at the lowest possible prices. Our ...

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

Uses local climate data, your roof measurements, current local electric rates and current solar system cost to generate an accurate solar cost and savings estimate, customized for your home.

Plug-in solar has remained in the shadows because of a lack of safety standards and often costly requirements imposed by utilities, but that's changing.
