Well, the newly operational Honiara Energy Storage Power Plant isn't just another infrastructure project - it's rewriting the rules of energy resilience for small island states.

Noro power station was built and commissioned in the late 80's and have not undergone major maintenance since. This project involves major refurbishment of the station totaling over \$3m and the ...

The Asian Development Bank (ADB) and the Government of Solomon Islands have unveiled a groundbreaking renewable energy initiative designed to diminish the country's reliance on fossil fuels ...

By increasing the generation capacity of renewable energy facilities, solar power will provide access to electricity for low-income households in peri-urban and rural areas of the Solomon Islands.

The Solomon Islands Renewable Energy Development Project will finance two solar farms and a utility-scale grid-connected energy storage system on the Solomon Islands.

Summary: Discover how the Solomon Islands is pioneering a hybrid renewable energy solution combining solar power and pumped storage technology. This article explores the project's design, ...

Clearway Energy Group has brought online the first ever utility-scale solar-plus-storage project on the Hawaiian island of Oahu. Installation of solar PV modules and batteries ...

The project involves installation of solar-diesel hybrid systems with battery (energy) storage at Solomon Power's provincial power stations to reduce reliance on diesel usage.
