Overview Residential solar PV Government programs Operational and projected plants Solar thermal energy See also External links South Africa has experienced an increase in the installation of solar PV since 1992. The low electricity tariffs offered by Eskom prior to 2010 has led to a recently rapid installation increase. The shift in installations can be seen across all segments of consumers including industrial, agricultural, commercial and residential. There are predictions that indicate that there would be a continuous decline in the cost of Solar PV well beyond 2020.

With strong government incentives and a surge in rooftop solar installations, South Africa is beginning to reshape its energy future. But what's driving this solar boom, and what challenges ...
