As a legacy from Spain's earlier development of solar power, the country remains a world leader in concentrated solar power. Many large concentrated solar power stations remain active in Spain and ...

OverviewTimeline of developmentsSolar thermal power plantsPhotovoltaicsPolicies, laws and incentivesResearch and developmentExternal linksThrough a ministerial ruling in March 2004, the Spanish government removed economic barriers to the connection of renewable energy technologies to the electricity grid. The Royal Decree 436/2004 equalised conditions for large-scale solar thermal and photovoltaic plants and guaranteed feed-in tariffs. Spain added a record 2.6 GW of solar photovoltaic power in 2008, a figure almost fiv...

Declared of strategic interest by the Junta de Andaluc&#237;a, the installation of the 400,000 bifacial solar panels with trackers has provided a significant economic boost to the local economy,...

In a move that aligns with its national decarbonization goals, Spain has added over 5 GW of new solar projects to its 2025 permitting pipeline. Spain is directly in the crosshairs of climate ...

Spain has been expanding its solar PV capacity by commissioning several commercial-scale solar PV plants. Read more about the largest PV plants in Spain.

In 2023 and 2024, Spain added more solar power capacity than any other European country except Germany, whose economy is more than twice its size. Aggressive bidding between ...

Seville/Paris, May 22nd, 2025 - TotalEnergies inaugurates its largest solar power plant cluster in Europe, near Sevilla in Spain. It consists of five solar projects with a total installed capacity of 263 MW.

In just a few months, Spain has green lit more than 65 GW of solar projects that launched new hydrogen and battery storage pilots in order to increase its backing of global fusion research. It ...
