---

Considering the advantages of photovoltaic power generation, we introduce photovoltaic power generation systems into the field of communication base ...

icipation in power generation. In June 2021, the SEHC, announced Sudan's first-ever call for developers to submit expressions of interest for developing utility-scale solar and wind power plants under the ...

Sunrisesenergy delivers customizable solar energy storage systems for communication base stations, featuring lower operation costs, reliability, and easy maintenance.

Financed by the International Development Association (IDA\*) with a total of \$76.3 million, ASCENT-Sudan aims to provide electricity and enhanced internet access to 150,000 people, installing 500 ...

The communication base station installs solar panels outdoors, and adds MPPT solar controllers and other equipment in the computer room. The power generated by solar energy is used by the DC load ...

We conduct in-depth site evaluations, energy usage assessments, and system design tailored to Sudan's environment. Whether it's a government facility, farm, or NGO, our engineers deliver ...

Let's explore how solar energy is reshaping the way we power our communication networks and how it can make these stations greener, smarter, and more self-sufficient.

Innovative energy for resilient livelihoods in underserved regions. We design, install and maintain solar systems that empower Sudanese communities and businesses. Reliable off-grid systems for ...
