Should I buy a lithium RV battery?

Most older RVs were equipped with lead-acid batteries, which are still very common today. But if you need to replace (or simply want to upgrade) your existing batteries, there are several reasons to consider a lithium RV battery. Lithium batteries last longer than their lead-acid counterparts.

How long do lithium RV batteries last?

Cheaper lead-acid batteries typically last five or six years, but their exact lifespan will depend on how you use them. But because of the technological innovations going into these lithium RV batteries, their normal lifespans are closer to double those of lead-acid batteries.

Does a lithium RV battery produce AC power?

Most of these lithium RV batteries provide a 12-volt DC power output. And it's worth noting here that some of the appliances in your RV probably require AC current in order to be powered sufficiently. Fortunately, this doesn't mean that you'll need to find a battery that produces AC output.

How do I connect a new lithium battery to my RV?

Once your new lithium battery is set in the same place where your old battery was installed, locate the positive (+) and negative (-) signs on the wingnuts of the battery. These tell you where to connect the appropriate cable leads coming from your RV's electrical system.

Explore our range of power banks, solar panels, and stations for RV power and on-the-go energy. Whether hiking, camping, or exploring, trust Swiss Tech craftsmanship to keep your devices charged.

In this guide, we review three top-rated complete RV solar systems (with batteries included) that make solar power for RVs simple and reliable.

This deep cycle lithium battery provides efficient, long-lasting power for your RV. Built-in BMS protects your battery and optimizes charging from solar controllers and converter chargers. Longer ...

Fortunately, you've come to the right place to start sorting through the battery options currently on the market. We've researched your options for you and narrowed them down to six of ...

Upgrading your RV to solar power and lithium batteries for full off-grid camping is a fantastic way to gain independence from shore power or generators.
