Smart Module By Tongwei Quality as deck, innovation as sail We ship reliable and advanced PV modules by virtue of leading modern intelligent manufacturing.

After more than 10 years of rapid development, Tongwei has become an integrated PV enterprise with high-purity polysilicon production in upstream, high-efficiency solar cell and module production in ...

Before installing, the installer must be familiar with their mechanical and electrical requirements. Please keep this manual in a safe place for future reference (care and maintenance) and in case of sale or ...

photovoltaic module, and the installation part must be treated with anti-corrosion. Please consult the Tongwei technical support department for more information on the use of modules in special ...

TW Solar produces bifacial solar panels. These panels are relatively see-through, using a clear backing sheet to capture sunlight from both sides of the module. Additional electricity can be generated by ...

As the sole representative in the photovoltaic industry, Tongwei has secured one of the first batch of national-level pilot-scale demonstration platforms! Collaborate globally with friends to innovate, build ...

When the module is installed on the supporting column, it is necessary to ensure the supporting column and module installation structure is capable of withstanding the expected local wind.

It is recommended that the Module be installed by professionals with experience in PV system installation, and that protective measures such as protective headgear, insulated gloves and rubber ...
