The extra layer of scrutiny for wind and solar contrasts with actions by the Trump administration to make it easier and cheaper for companies to produce oil, coal, gas and nuclear power.

The "One Big Beautiful Bill Act" -- budget reconciliation bill signed into law on July 4 -- and a new Executive Order (EO) have clarified that solar and wind generation.

Last week, more than 100 solar companies penned a letter to Congressional leaders urging them to revoke the Interior Department policy, which they said amounted to a near ...

New installations of generating capacity support the increase in our renewable generation forecast. Wind and solar developers often bring their projects on line at the end of the calendar year.

2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new restrictions, ...

"The growth of renewable energy in America has exceeded even the sunniest expectations," said Johanna Neumann, senior director of Environment America Research & Policy ...

In 2023, an estimated 96% of newly installed, utility-scale solar PV and onshore wind capacity had lower generation costs than new coal and natural gas plants. In addition, three-quarters of new wind and ...

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act (the OBBB), which significantly rolls back many of the core tax incentives that clean energy projects have relied on since ...
